KEY ACHIEVEMENTS

Mine Action and Debris Removal

UNDP: Concluded in end-May the phase two of a competition organized with the National Aviation University to find innovative solutions to speed up mine and explosive ordnance clearance. Over 20 teams presented various technologies, including acoustic and electromagnetic methods. UNDP also supports mine action through awareness campaigns, demining, and technology introduction.

UNICEF: Reached nearly 300,000 children and caregivers with mine-safety campaigns in March and April 2024 alone. The agency is currently organized an online course for 1,050 educators and 3,132 emergency workers on delivering effective mine safety messages to children.

WFP and **FAO** are working in Kharkivska and Mykolaivska oblasts to reclaim farmland and support rural families and small farmers to return to self-sufficiency and reduce their dependence on humanitarian assistance. Since September 2023 to date, nearly 4,000 ha of land have been surveyed and US\$2.3 million has been invested in the local economy.

Infrastructure Reconstruction

UNICEF: Completed in April the rehabilitation of 63 kindergarten bomb shelters across Kyivska, Zhytomyrska, and Chernihivska oblasts, providing furniture and learning materials.

UNICEF: Improved access to clean water for over 567,000 people in the first quarter of 2024 with new equipment, pipes, and water treatment chemicals.

Energy and Environment

UNICEF: Installed in May 2024 boilers in villages, health-care facilities, and schools in Kharkiv Oblast.

WHO: Currently installing eight modular heating units in hospitals across the country – with the first units already functioning in Chernihiv, Kharkiv and Odesa.

UNIDO: Helping companies implement distributed generating capacity and increased energy efficiency by supporting energy supply solutions based on renewable energy combined with energy efficiency measures.

UNDP: Provided, since end-last year, three powerful gas turbines and facilitated the transport of seven autotransformers to decentralize the energy system, benefiting 5.5 million people.

Housing

UNHCR: Supported, in the first quarter of 2024, repairs of common areas in 34 multistorey buildings in Izium and 11 in Kharkiv city, making nearly 6,000 families eligible for state compensation to address damage to their properties. This program will expand to other regions.

Livelihoods and Decent Jobs Creation

IOM: Concluded in April a project that created, over the past two years, 2,000 new jobs and preserved 5,000 existing ones, and provided grants to 753 businesses and start-ups, including those relocated and affected by the war.

UNHCR: Supported livelihood activities for internally displaced people through job fairs, counselling, and digital hubs, including through organizing a job fair in April in Zhytomyr, reaching almost 100 participants who got information on grants and employment opportunities from educational institutions and representatives of more than 10 leading employers in Zhytomyrska Oblast.

Enabling Factors

UN Women: Organized a series of consultations and dialogues with women-led organizations to ensure their empowerment and participation – and that their voices and needs are taking into consideration – in the Ukraine's journey to recovery. In March and April, two

forums were organized in Kharkiv and Poltava, involving local and national authorities, diplomatic community and women civil society organization working in eastern Ukraine.

UNICEF: Engaged eight pilot hromadas in Lviv Oblast for gender-responsive budgeting, training over 75 local officials in the first quarter of 2024.

UNHCR: Held a consultation in April 2024 in Borodianka hromada to coordinate recovery efforts, involving multiple stakeholders.

Social Protection

UNICEF: Currently supporting the pilot of the Government's Integrated Social Service and Benefits Package (ISSB) in 60 municipalities. ISSB is the cornerstone of Better Care reform, established last year by the Government of Ukraine, with UN's support, to prevent family separation, increase alternative care options, and transform institutions to ensure that all children can grow up in a family-based care.

WFP: Expanded its school feeding program in the current academic year to support 100,000 children in nearly 700 schools all around the country by contributing 30 per cent of the cost of their daily meals. Provided complementary cash assistance since August 2023 to 400,000 pensioners and since January 2024 to 300,000 people with disabilities.

UNHCR: Provided, until March, 130,000 pensioners with cash assistance to help them purchase household fuel during the harsh winter.

Education

UNICEF: Provided, during the current academic year, support to the Ministry of Education and Science in adapting the national early childhood education (ECE) curricula to fit mixed-modality education, where facility-based learning is combined with home-based support. In addition, UNICEF developed materials for educators and parents to streamline ECE at schools

and at home. Over 35,000 children have already gained access to structured in-person ECE with the support of the intervention. Organized classes in safe spaces to continue education despite kindergarten closures.

Health

WHO: Held a training session in May on addressing chemical, biological, radiological, and nuclear hazards. Procured 20 decontamination tents for health-care facilities in five oblasts.

UNIDO: Launched in April 2024 a training programme aimed at enhancing the capabilities of Ukrainian prosthetists using advanced 3D printing technology. The training introduces advanced Japanese 3D printing technology into the production of prosthetics, bringing 3D printers and training ten prosthetists from Ukrainian rehabilitation centres.
